Recall #: R0252-1 | Starter Switch Assembly Recall Date: 2024 Jul 11

Recall Description

Issue: On certain vehicles, the starter solenoid could be contaminated with water if operated in abnormally wet conditions, such as a flooded road; potentially causing an electrical short over time. Safety Risk: An electrical short could result in significant overcurrent increasing the risk of an engine compartment fire while parked or driving. Corrective Actions: Hyundai Canada will notify owners by mail and advise you to take your vehicle to a dealership for the installation of a remedy relay kit in the engine junction box. Owners can continue driving these vehicles; however, Hyundai Canada recommends parking their vehicles outside and away from structures until the recall remedy is completed.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact HYUNDAI or visit [Hyundai's website](https://recall.hyundaicanada.com/). (https://recall.hyundaicanada.com/)
